Table S1 . dates, solar wind parameters and shock geometry for 22 high-beta shocks observed by closely spaced Cluster spacecraft.

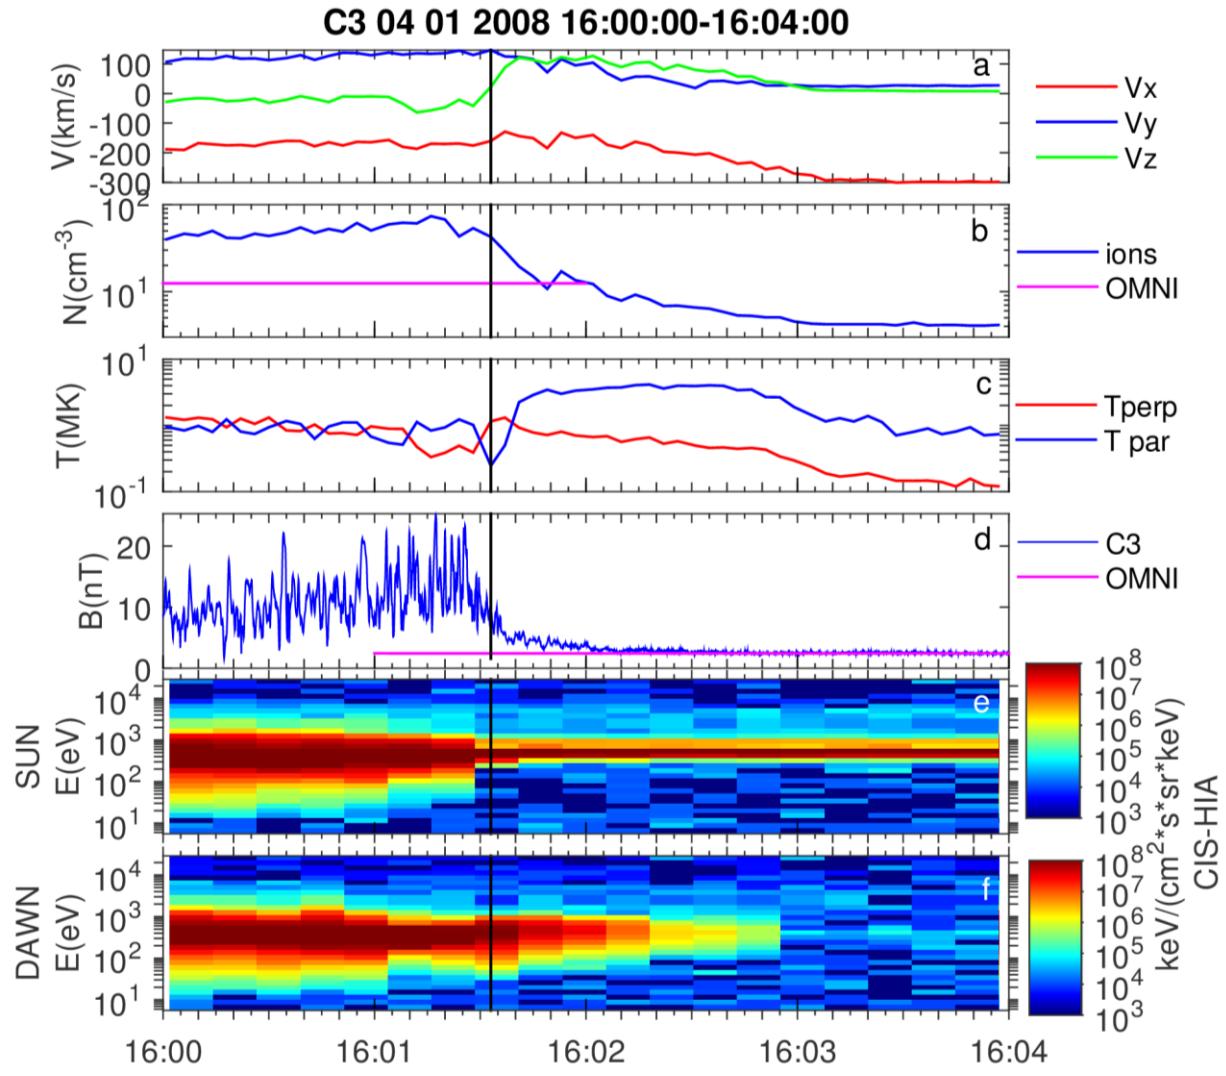

Fig. S1. Overview of C3 magnetic and plasma (HIA) measurements for event 04 January 2008. (a) ion velocity, (b) ion density and OMNI solar wind density, (c) ion parallel and perpendicular temperature, (d) magnetic field magnitude and OMNI IMF magnitude, (e,f) ion spectrograms for the sunward and dawnward looking sectors.

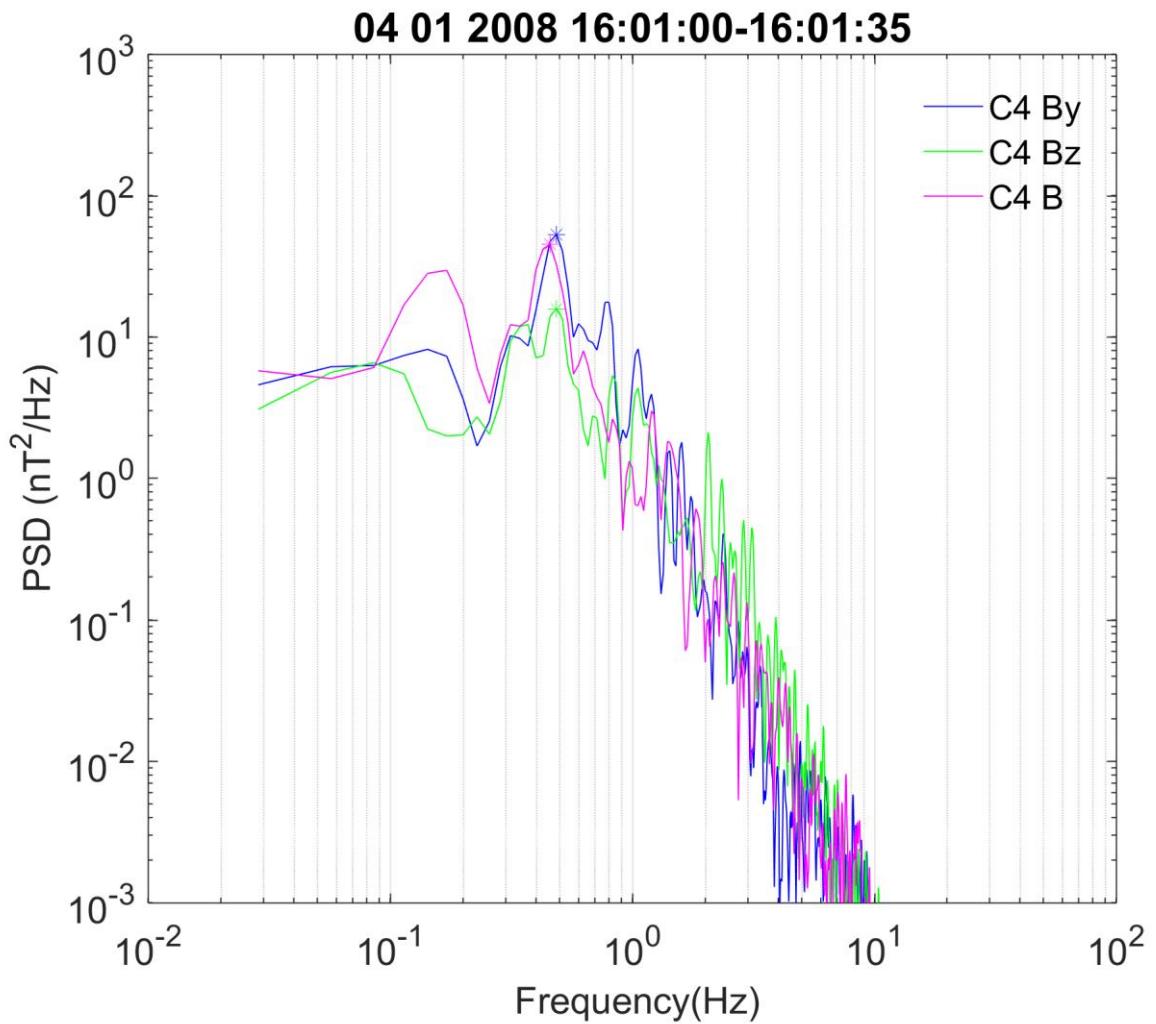

Fig. S2 C4 frequency spectra for By, Bz magnetic components and magnetic field magnitude for shock 04 January 2008.

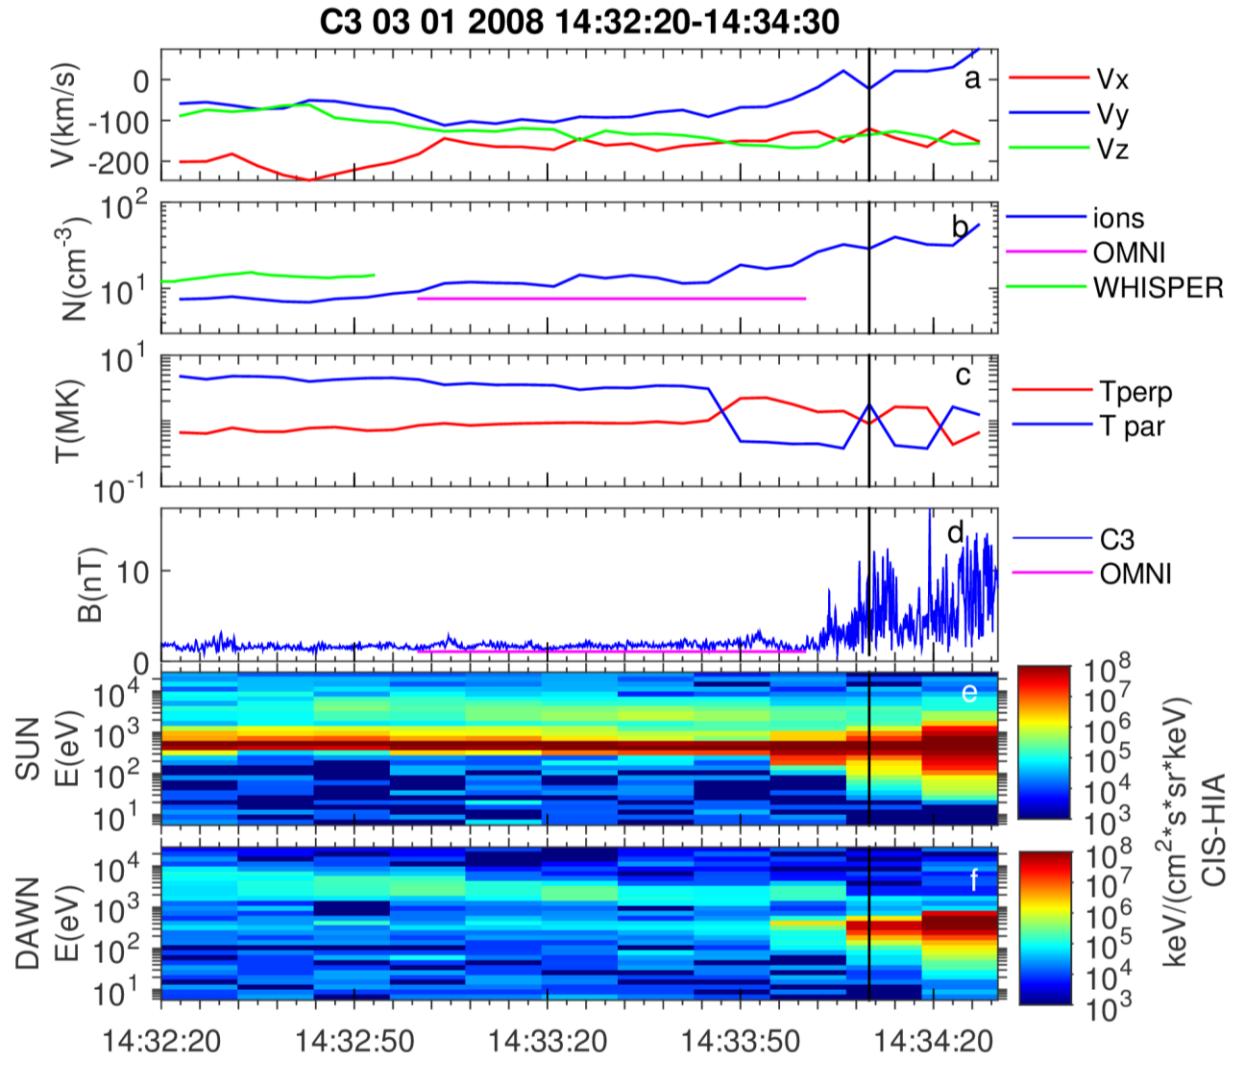

Fig. S3. Overview of C3 magnetic and plasma (HIA) measurements for event 03 January 2008. (a) ion velocity, (b) ion density and OMNI solar wind density, (c) ion parallel and perpendicular temperature, (d) magnetic field magnitude and OMNI IMF magnitude, (e,f) ion spectrograms for the sunward and downward looking sectors.

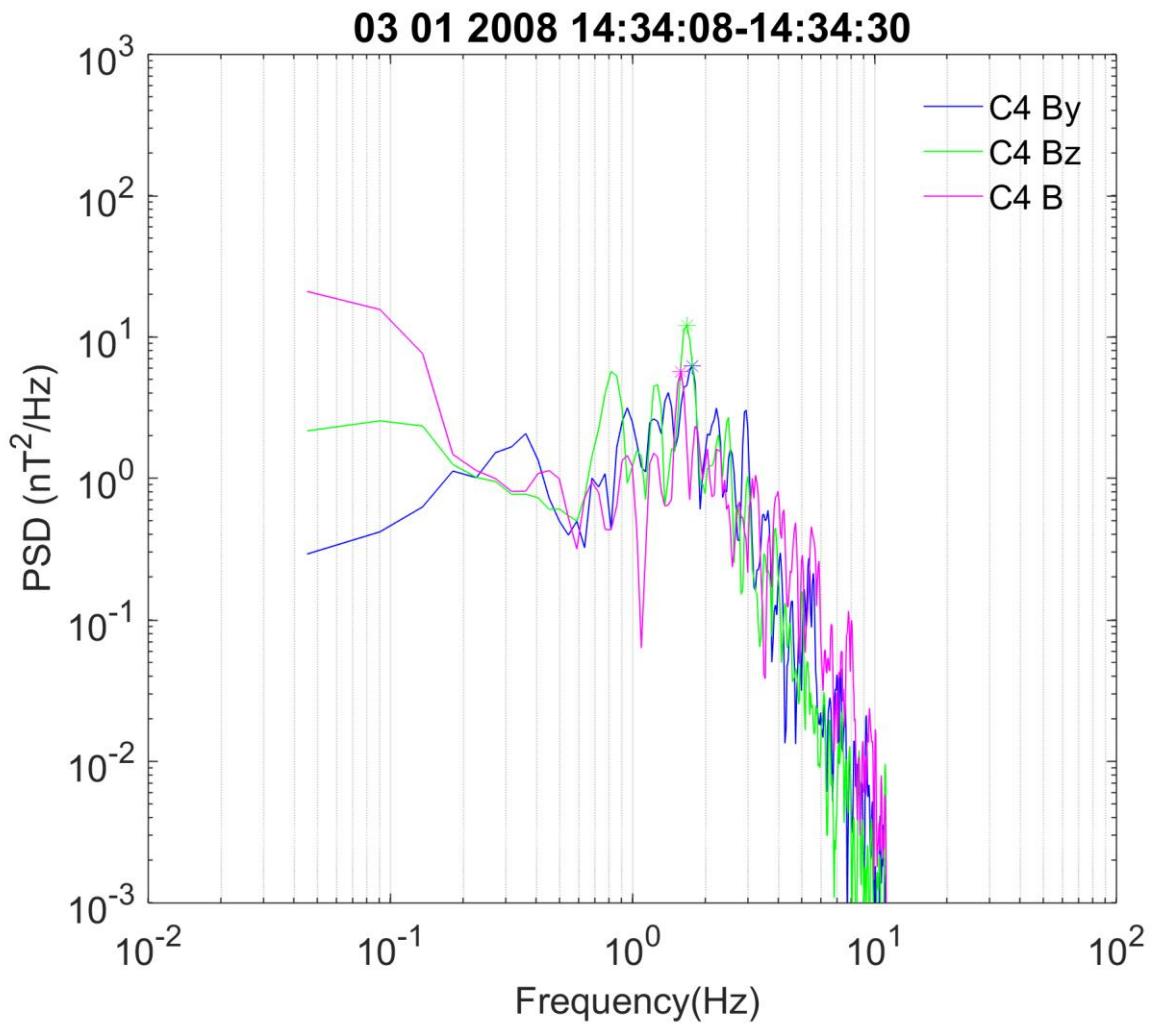

Fig. S4 C4 frequency spectra for By, Bz magnetic components and magnetic field magnitude for shock 03 January 2008.
