Received and published: 25 October 2018

Thanks for your comments on this manuscript. The authors have incorporated all the comments in revised manuscript, which are very helpful to improve the manuscript. The terminology “TEC” has been replaced with “Ionospheric delay” to avoid possible confusion. One table has been added to describe the location of estimation points. One figure has been revised to match its previous figure. One figure has been added to discuss the estimation results in 10 degree. A detailed revision list and the revised manuscript are in the supplement file.
