We thank the reviewer for his/her comments. Our specific response is as follows:
Regarding the two references, we already reference and discuss Kiviranta in Section 4. The Bender model is, as of this writing, still under review. Further, SCIAMACHY measured at a local time near SNOE so it should be similar to NOEM. We thus have declined to add this reference.

Yes, the reviewer is correct about Figure 1- we apologize and thank the reviewer for catching it; it was our error and is now corrected.

Figure 9: we have added discussion about the meteor wind data.
The technical edits have been implemented. We note that the word “by” was supposed to be part of one word “whereby”.
