Received and published: 20 July 2018

Dear referee,

In the addition to my previuous answer I want to add the more detail information about the paper by Ted Speiser about reconnection without the need for (noise) turbulence.

T. W. Speiser Conductivity without collisions or noise // Planet. Space Sci. 1970, Vol. 18, pp. 613 to 622.

Best regards, Liudmyla
