Received and published: 16 July 2018

We thank the referee for his comments that has been considered, namely:

1) Concerning the item 4, I want to know the dimension (in latitude and longitude) of the area around L’Aquila which has been investigated when you are speaking about 102 half-orbits.

We modify the text specifying the dimension of the Area around L’Aquila that we investigated. We considered a square cell centered at the geographic latitude and longitude of L’Aquila of 1° of latitude and 1° of longitude.
