5 Dear Dr. Bunescu,

I am happy to write you that your manuscript will be accepted for publication, once you include your reponses (including Figure 1 of response) related to the referee's concerns on applying to the complex cases in your manuscript, which are currently missing except a couple of short sentences. These discussions are important to be included also in the manuscript.

10

Best regards,  
Rumi Nakamura

15 Dear Editor,

Thank you very much for your evaluation of the manuscript "Multiscale estimation of the field-aligned current density".

20 The manuscript was updated by including Figure 1 from the previous response. As suggested we updated section (4.3) of the manuscript with the discussion included also in the previous response. The new added text is indicated with blue whereas the red color indicates the text from the previous iteration.

Yours sincerely,  
Costel Bunescu
