Dear Dr. Schuch One of the reviewers of your manuscript "The Present & Future of the Brazilian INPE-UFSM NANOSATC-BR, CubeSats Development Program" submitted to Annales Geophysicae, already posted the comments. The reviewer finds the paper important to publish but suggests substantial restructuration of the manuscript and a more profound development of the results section. My suggestion is that you start revising the manuscript following the reviewer comments' even though comments from other reviewers are still to come.
