

Interactive comment on “Characteristics of ionospheric irregularities near the northern equatorial anomaly crest” by Jinghua Li et al.

Jinghua Li et al.

guanyima@nao.cas.cn

Received and published: 28 October 2019

Thank you for your valuable and useful suggestions. We made major modification by adding another GPS receiver located at (31.10°N, 121.20°E). The data from the two stations can prove the results in the last manuscript better. In addition, we improve the English writing. The response to your comment are attached.
