

Interactive comment on “Jets in the Magnetosheath: IMF Control of Where They Occur” by Laura Vuorinen et al.

Anonymous Referee #1

Received and published: 17 June 2019

The authors have addressed my remaining issue, and with the additional text they suggest (perhaps together with a comment along the lines of "This criterion prevents multiple consecutive peaks from being counted as individual jets.", as they include in the reply), I am now happy to recommend the paper for publication.

Interactive comment on Ann. Geophys. Discuss., <https://doi.org/10.5194/angeo-2019-65>,
2019.
