Reviewer report of "Ducting of incoherent scatter radar waves by field-aligned irregularities" by Rietveld and Senior

The authors have addressed the comments I had in the previous reviewer report in a satisfactory manner apart from the two listed below. The line numbers refer to the revised version of the manuscript. I recommend that the manuscript is accepted without further review as long as the two minor technical issues are corrected.

L122-123: Abbreviations/terms foF2 and fxF2 not explained.

L223-224: The equation's variables are still missing from the text.
