We are very grateful to the Referee for comments. 1. Okay, we will read the papers (Varotsos, C. 2002; Varotsos, C. 2003) and we will cite them in our paperwork. 2. Thank you, this is a very valuable comment. We will add a citation to the paperwork (Lomb, N. R. 1976). 3. The first referee had a similar comment. We will use the term "planetary wave". 4. Unfortunately, I have an intermediate level of English and little experience in writing paper in English. I'm working hard on my English. I hope the corrector helps me fix all errors.
